These word problems feature real classmates from our survey, matched to our official roster — more names coming as the rest of the class turns in their surveys!

Quick recap: to **multiply fractions**, multiply straight across — **numerator × numerator** on top, **denominator × denominator** on the bottom. Then simplify by cancelling out any shared factors, one step at a time, until nothing more will cancel.

1 Worked Example

Carter Foster and **Kynndal Jackson** are designing a model clubhouse together — inspired by Carter's love of inventing houses! Their blueprint uses $\frac{4}{5}$ of a poster board for the walls. Of that wall section, $\frac{5}{8}$ is used just for the windows and the door. What fraction of the *whole* poster board is used for the windows and door?

$$\frac{4}{5} \times \frac{5}{8} = \frac{20}{40} \rightarrow \text{cancel a shared 5} \rightarrow \frac{4}{8} \rightarrow \text{cancel a shared 4} \rightarrow \frac{1}{2}$$

2 Your Turn

Rickale Murphy bought a family-size bag of Takis, her favorite snack, to share. She gave $\frac{2}{3}$ of the bag to her friend **Aaron Hode**. Aaron Hode then ate $\frac{3}{4}$ of the Takis he was given. What fraction of the whole original bag did Aaron Hode eat?

FRACTION 1: ____ / ____ FRACTION 2: ____ / ____ PRODUCT: ____ / ____ SIMPLIFIED: _____

3 Your Turn

Lauryn Davis brought a big jug of her favorite Mango Soursop juice for a class taste-test. She poured out $\frac{5}{6}$ of the jug into cups. **Chamille Harris** then drank $\frac{2}{5}$ of the juice that had been poured out. What fraction of the *entire* jug did Chamille Harris drink?

FRACTION 1: ____ / ____ FRACTION 2: ____ / ____ PRODUCT: ____ / ____ SIMPLIFIED: _____

4 Your Turn

Alayna McCarty baked a tray of ice cream cake, her favorite dessert, for the school bake sale. By the end of the morning, $\frac{2}{5}$ of the tray was left. **Lorne Nelson's** family bought $\frac{1}{2}$ of that remaining $\frac{2}{5}$ in the afternoon. What fraction of the *whole original* tray did Lorne Nelson's family buy?

FRACTION 1: ____ / ____ FRACTION 2: ____ / ____ PRODUCT: ____ / ____ SIMPLIFIED: _____

5 Your Turn

Chamille Harris helped restock the snack shelf, filling $\frac{5}{6}$ of it with treats including Gushers — **Lorne Nelson's** favorite snack! Later, $\frac{3}{10}$ of what Chamille filled was moved to the front office for early pick-up. What fraction of the *entire shelf* ended up at the front office?

FRACTION 1: ____ / ____ FRACTION 2: ____ / ____ PRODUCT: ____ / ____ SIMPLIFIED: _____

☆ A fraction of a fraction is still a fraction of the whole! ☆
